

# Annual Preventative Maintenance: Your System's Health Check

## Peace of Mind in Under Two Hours

An annual preventative maintenance inspection is recommended for your Electrafy™ system.

When a maintenance appointment is booked, expect approximately two (2) hours to complete. While no parts are required to be replaced during your maintenance inspection, you should expect the following activities/steps to take place during your maintenance appointment:

- Battery Test
- Power Conversion Test
- Vent Cleaning
- Connection Inspection
